

EXPERIMENT 9

Creating and Testing Snapshot of a Virtual Machine

Aim

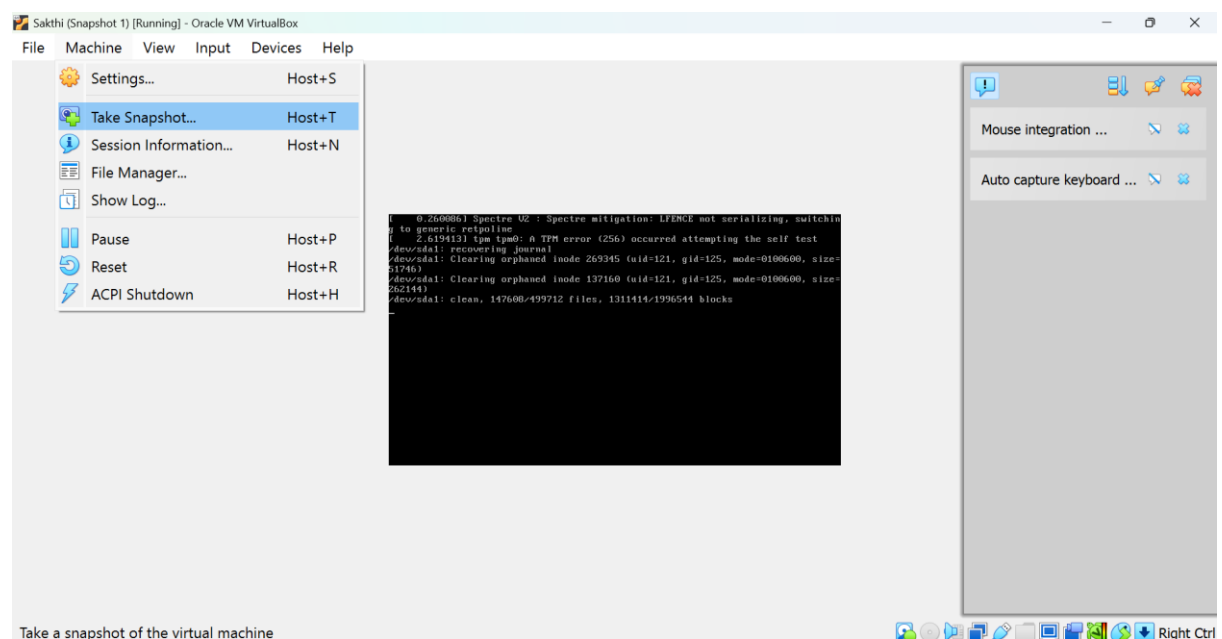

To create a snapshot of a virtual machine and restore it to a previous state.

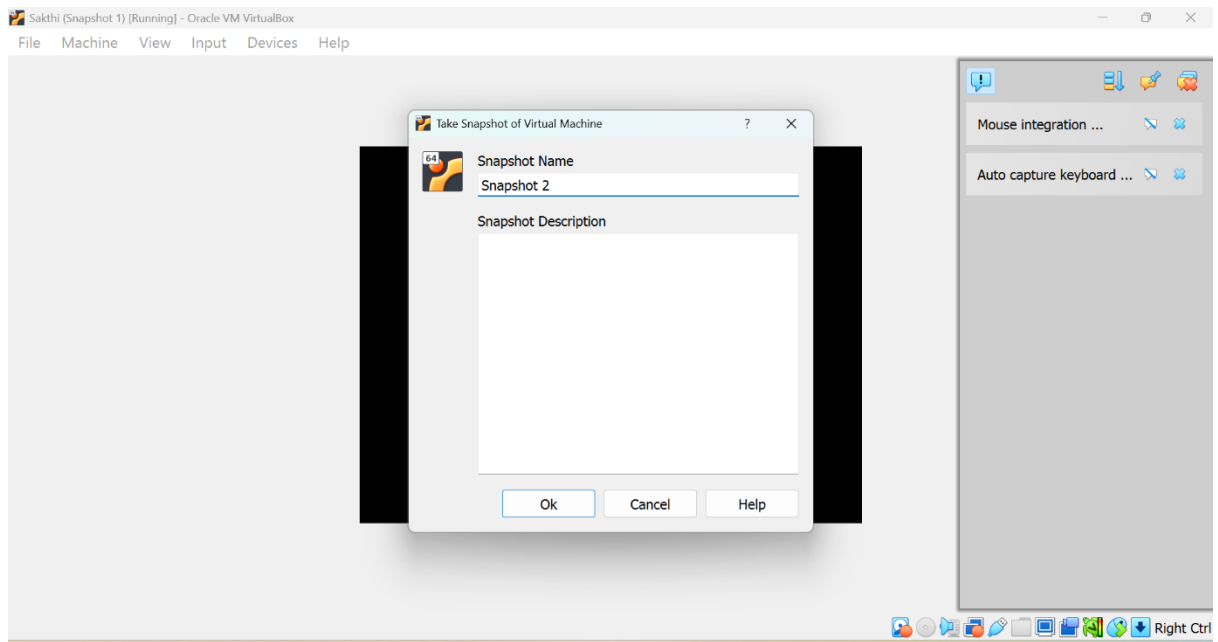

Procedure

1. Start the virtual machine.
2. Go to **Snapshots** → **Take Snapshot**.
3. Name the snapshot.
4. Make changes to the VM.
5. Restore the VM to the snapshot state.

Output

- VM restored to its previous version.

Result

Thus, snapshot creation and restoration of a virtual machine were successfully tested.
