

## EXPERIMENT 15

### Creation and Testing of Snapshot in VMware Workstation

#### Aim:

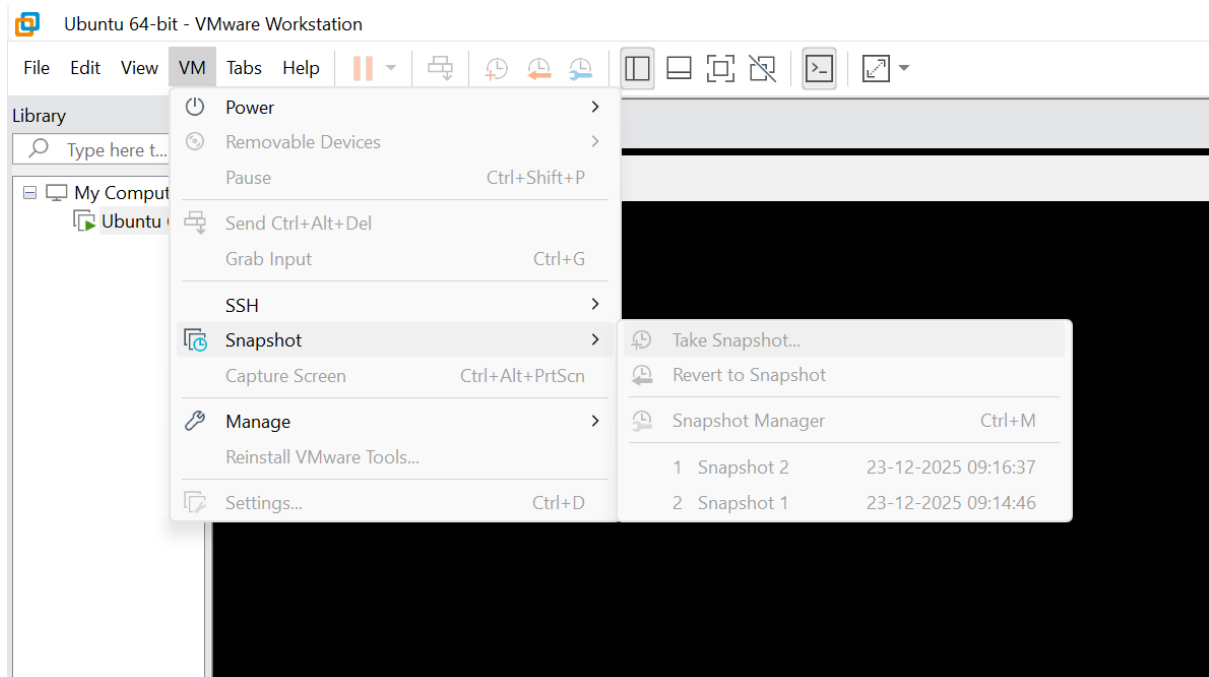

To create a snapshot of a Virtual Machine and restore it to a previous state using VMware Workstation.

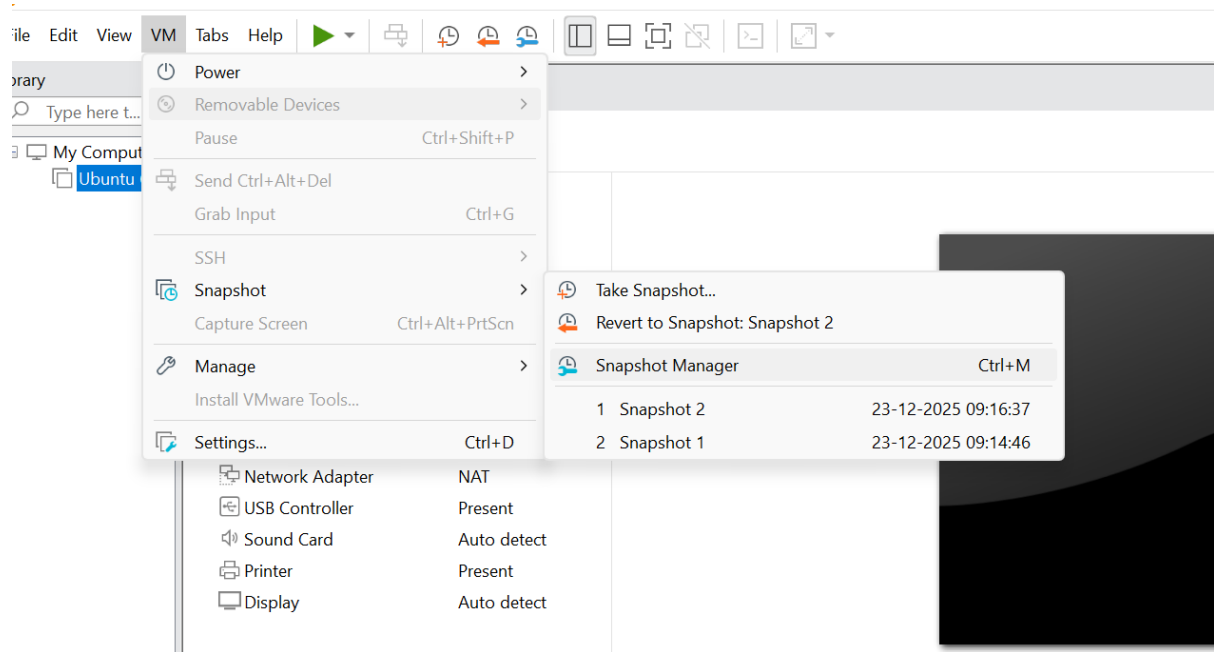

#### Steps

1. Power ON the Virtual Machine.
2. Click **VM** → **Snapshot** → **Take Snapshot**.
3. Enter snapshot name and description.
4. Click **Take Snapshot**.
5. Perform changes in the VM (install software or modify files).
6. Open **Snapshot Manager**.
7. Select the snapshot and click **Go To**.

#### Output

- Snapshot successfully created.
- Virtual Machine reverted to the saved snapshot state.

## Result

Thus, snapshot creation and restoration were successfully performed using VMware Workstation.
