

EXPERIMENT 8

Creation and Allocation of Virtual Hard Disk in VirtualBox

Aim

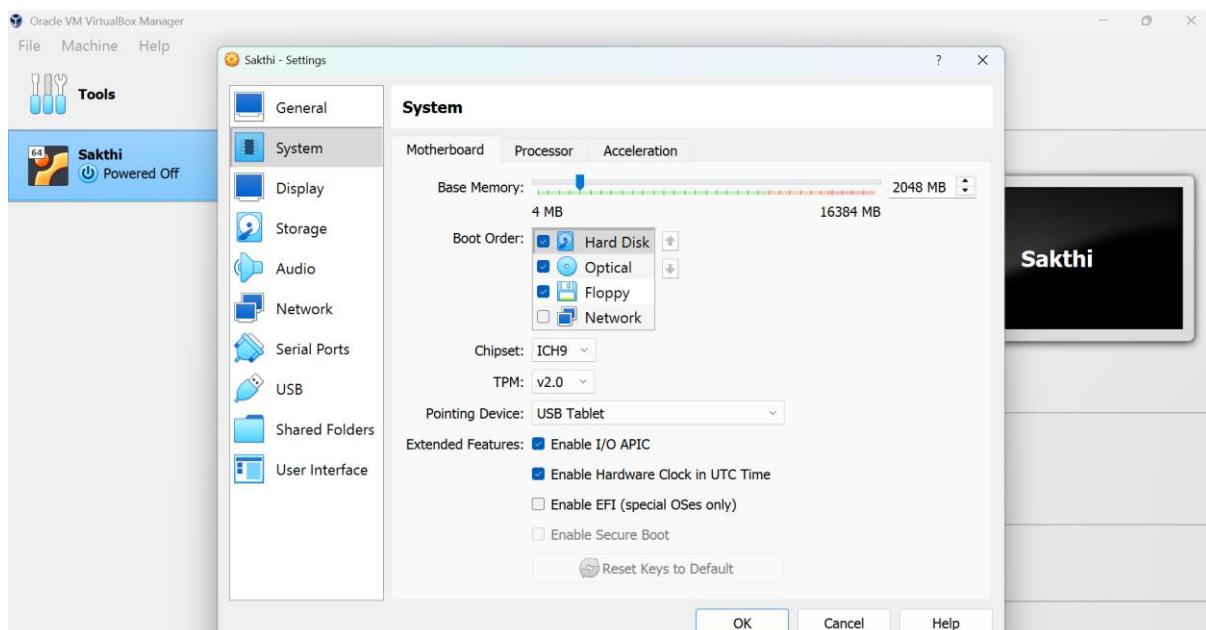

To create a virtual hard disk and allocate storage using VirtualBox.

Procedure

1. Open VirtualBox and select the VM.
2. Go to **Settings** → **Storage**.
3. Choose **Create New Virtual Hard Disk**.
4. Select disk type (VDI).
5. Choose dynamically allocated or fixed size.
6. Allocate storage size.
7. Attach the disk to the VM.

Output

- Virtual hard disk successfully created and attached.

Result

Thus, a virtual hard disk was successfully created and allocated using VirtualBox.
